Objective

I am currently seeking a position within an organization that focuses on User Experience (UX) and User Interface Design (UI). Additionally, I have expertise in converting UI designs into pixel-perfect, responsive HTML5/CSS3 using technologies like React and Next.js.

My goal is to create seamless and intuitive user experiences while crafting visually appealing interfaces. With proficiency in React and Next.js, I can seamlessly translate UI designs into interactive and dynamic web applications, ensuring they are fully responsive across various devices.

I am excited about the opportunity to contribute my skills and passion for UX/UI design in a dynamic environment that values innovation and user-centric approaches.

I am able to work effectively in a team. I enjoy a challenge and look for the opportunity to expand and develop my skill set. My aim is to create better interfaces and experiences for the user, making the web, applications and technology easier for the user. I would like to work together with web design firms and do my best for the best result. What does matter is the output of my work, which is always focused at the point.

I am a fast learner and I need opportunity to show my skills. Also detailed-oriented in creating websites with perfect user experience. Hope I will heard a positive response from you.

Skills

<ul style="list-style-type: none">• HTML 5• CSS 3• CSS Frameworks / Bootstrap / UI kit• CSS Grid / Flex box• CSS Preprocessor / SASS• Wordpress• Php• Material UI	<ul style="list-style-type: none">• JavaScript / jQuery• Adobe Photoshop• Figma• React / Redux• Next JS• Mongo DB• API Integration• Git
